Certificate of Compliance

Rantec Corporation certifies Super Tack has been tested and meets the requirements of a tacking agent. This Statement is based on rain laboratory models, field tests and on the job.

Rantec Super Tack is a blend of granular dispersible guar gum with fast hydration and excellent adhesive properties.

Rantec Super Tack is a granular powder for use as a mulch stabilizer, a slurry lubricant, for straw and hay or hay mulch tacking, and for temporally stabilization of soil and sand.

Rantec Super Tack is biodegradable and non-toxic when used as directed.

Rantec Super Tack contains no germination or growth inhibiting materials and is non-toxic to fish or other wildlife when used as directed. Rantec Super Tack contains no antimony compounds.

A handwritten signature in black ink that reads "Lloyd Marsden".
