Dust X™

MAKE YOUR WATER WAGON MORE EFFECTIVE

PRODUCT DESCRIPTION

Dust X™ added to road water improves efficiency by retaining water longer. Run off is reduced. Evaporation is slowed. Watering runs can be reduced by 25% - 30%.

Dust X™ is a non-corrosive environmentally friendly formulation of long chain polymers that adds viscosity to the water, reducing runoff. Dust X™ chemically bonds to aggregate and dust particles to control dust longer than water alone. The film forming of Dust X™ reduces evaporation allowing water to be effective for longer periods.

APPLICATION GUIDELINES

Simple – Just add Dust X™ tablets to the water tank during filling. The self-dissolving tablets quickly disperse into the water and are ready for application.

Apply at a rate of 3-5 tablets per 1000 gallons. Reapply only as roads become dried. Liquid versions available on request.
